

Cool Whipped Frosting

Description

Ingredients

1 container (8 ounces) of whipped topping (like Cool Whip)
1 package (3.4 ounces) of instant vanilla pudding mix
1 cup of milk (whole or 2% works best)
1 teaspoon of vanilla extract

Directions

Combine Pudding Mix and Milk: In a medium bowl, whisk together the instant vanilla pudding mix and milk until smooth and well combined. Allow it to sit for about 2 minutes to slightly thicken.

Add Vanilla Extract: Stir in the vanilla extract into the pudding mixture.

Fold in Whipped Topping: Gently fold the whipped topping into the pudding mixture until everything is well combined and smooth. Be careful not to overmix, as you want to keep the mixture light and fluffy.

Chill: Refrigerate the frosting for at least 30 minutes before using to allow it to set. This will make it easier to spread or pipe onto your desserts.

Use as Desired: Use the frosting to decorate your cakes, cupcakes, or use it as a dip for fruit. It's light, fluffy, and has a deliciously smooth texture.
